

Science Homework Week 19 (_____)

All make up work due by Wednesday January 13th!

Monday – **Cornell Notes** on Plate Tectonics (this Monday p. 127)

Cornell Notes have 5 questions down the side and a 3 sentence summary at the bottom of the page.

Tuesday – **Vocabulary 19**

Rocks – a hard substance made from one or more minerals

Sediment – pieces of broken down rock

Convection current – movement of material due to temperature difference

Mantle – the thick liquid that make up most of the inside of the earth

Core – the solid inner most part of the earth

Wednesday – Write a **paragraph** with at least 3 sentences:

1. Telling what grade you think you will get
2. Telling how you improve your grade next semester (at least 3 ways!).

Thursday – Get a **new notebook** tonight or this weekend. You should have it by **Monday!**
