

## Science Homework Week 25 (\_\_\_\_\_)

Monday – No homework!

Tuesday – Vocabulary 25

Vestigial structure—a body part that may have been useful at one point, but now is not because of evolution

Selective breeding—when humans choose traits in organisms and breed then to get that trait

Natural selection—Darwin’s idea that nature selects traits that make an organism better adapted to its environment

Variation—the idea that a species has a lot of variety in traits (color, size, etc.)

Anatomy—the body structure of a living thing

Wednesday – Cornell Notes on Introduction to Evolution Notes (29-30). Write 5 questions along the left side and write a 3 sentence summary (not if you liked it or not).

Thursday – Create 2 pictures for the Evolution Layer book (one for paleontology and one for vestigial structures). Create a drawing and use one other material to make it spectacular!
