

Why Do We Need Trees?

1. Trees create the air (oxygen) we breathe.
2. Trees help water soak into the soil so it goes into wells and rivers.
3. Trees help clean the air and water.
4. Trees hold the land in place to keep erosion from happening.
5. Trees provide homes for animals.
6. Trees help the weather happen in the right places.
7. In cities, trees help keep the noise level down.
8. Around your home, trees can keep it cool in the summer.
9. Many trees provide food, firewood and other things people need.
10. Trees may help fight climate change.
