

## Science Notebook Set Up

1. You need a scissors and a glue stick.
2. You need to make a cover for the notebook with “Life Science Notebook”, a science picture (magazine, Internet photo, drawing), your name, period, and “Teacher: Mrs. DuPar” by Thursday 9/3.
3. The first 2 pages are the Table of Contents. The top will say, “Table of Contents”. Underneath it says “Title” on the left and “Page” on the right.
4. Number your pages (after the table of contents). A number goes in the upper right hand of the front side, then the upper left hand of the back side. Number the first 10 pages (to 20).
5. The next page will be the letter I wrote you. You will need to cut the next page out. Cut towards the left of the red line and make a tab to glue on. Put glue on the notebook and put the page on it.

This is better than gluing it on because it will be too thick eventually if you do.

Save these paper for later use (you can leave them here for us to use as a class).

### 6. Pages
