

## Pet Homes

We are looking for a good home over the summer for Rex. Rex is a leopard gecko who is about 7 or 8 years old. We think he is a male. He will come in his terrarium with a heat lamp and timer. He will also have some mealworms to eat (he can also eat crickets). He will need to come back to Ms. Bean (room 312 currently) when school starts next year.

We are also looking for a permanent home for Einstein. Einstein is a dwarf hamster who is about 7 months old. He is a male. He will come with a cage, running wheel and hamster ball. He will also have about  $\frac{1}{2}$  a bag of food and some pine chips for bedding. He can become a permanent member of your family!

If more than one student brings a signed form back to me, I will perform a lottery of some sort to decide who will keep them.

---

I have talked to my parents and can keep Rex for the summer.
